

PROBLEM STATEMENT:

Having difficulties to **DIFFERENTIATE** the Spice & Herbs

Unable to **RECOGNIZE** the Spice & Herbs

Lack of **BASIC KNOWLEDGE** for Practical Class

OBJECTIVE:

1

Produce interactive learning tools to encourage student engagement

2

Enhance students' understanding with a touch of technology

3

Assist students in recognizing & differentiate herbs/spice by the use of SENSORY evaluation

4

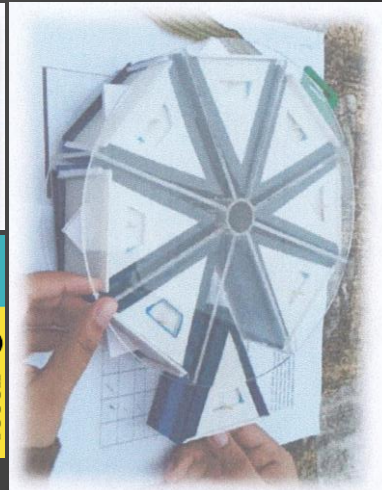

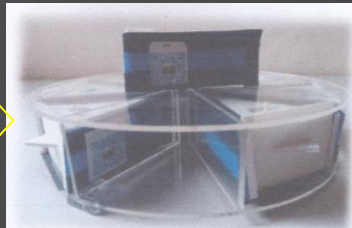

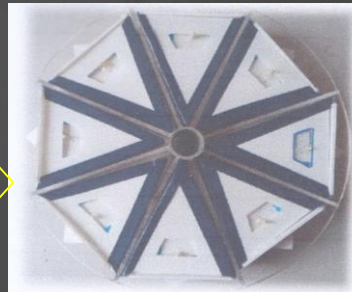

Equipped students with the basic knowledge before entering the practical class

PRODUCT DESCRIPTION:

FOSFAL is designed and address for students who have a difficulty in recognizing food items such as spices & herbs due to the similar characteristic among the food items.

FOSFAL is equipped with technological touch to assist students to learn the characteristic of each food item. FOSFAL can be played in a group or individually as it was designed compatible and user-friendly.

FOSFAL is comprised of few sections that will introduce the food item to the student with the application of sensory skills stage by stage. The skill of hearing is the first part to be tested among the player during the playing session followed by the smell, touch, sight and taste.

IMPACT:

Enhance student readiness, foster teamwork and engaging student participation

Fun and interesting learning modes while playing the FOSFAL

Transforming conventional teaching and learning methods that rely on notes

Accelerate the learning process of students through exploration using the senses
